

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A transparent grip ~~having~~ of a golf club, including a grip formed to enclose the circumferential end of a shaft of the golf club, wherein said grip(G) comprises:

a sheet layer (20) of an elastomeric material to increase the gripping and hitting ~~senses~~ sense and to alleviate ~~the~~ shock by covering the entire or a part of the circumference of shaft (10), and

a transparent layer or shell(40) that is transparent enough to allow light to permeate the light there through so as to make the sheet layer (20) visible or identifiable from the outside, and

said transparent shell(40) is provided with a cavity(400) to receive the shaft (10) to thereby ensure a firm coupling,

2. (Currently Amended) A transparent grip of a golf club, including a grip formed to enclose the circumferential end of a shaft of the golf club, wherein said grip (G) comprises:

a sheet layer (20) of an elastomeric material to increase the gripping and hitting sense and to alleviate shock by covering the entire or a part of the circumference of the shaft (10),

a transparent layer or shell(40) transparent enough to permeate the light so as to make the sheet layer(20) visible or identifiable from the outside, and; The transparent grip having golf club as defined in Claim 1, further including

a coating film layer(30) between the sheet layer(20) and the transparent shell(40) to protect the sheet layer(20).

3. (Currently Amended) The transparent grip ~~having~~ of a golf club as defined in Claim 2, wherein the coating film layer (30) is formed, on its surface, with a number of fine projections by pressing correspondingly the surface of the coating film layer(30).

4. (Currently Amended) The transparent grip ~~having of~~ a golf club as defined in Claim 2, wherein the transparent shell (40) is made of ~~the~~ at least one of the group consisting of polyurethane resin; ~~the~~ synthetic rubber (EPDM) composed of the mixture of ethylene, propylene and non-conjugated diene; ~~the~~ synthetic rubber composed of EPDM added further with the styrene-butadiene-rubber, dioctylphthalate and natural rubber; or ~~the~~ ethylene-vinylacetate-copolymer (EVA).

5. (Currently Amended) The transparent grip ~~having of~~ a golf club as defined in Claim 4, wherein the transparent shell (40) is further ~~added with~~ includes a perfume.

6. (Currently Amended) The transparent grip ~~having of~~ a golf club as defined in Claim 5, wherein the transparent shell (40) is further ~~added with~~ includes a antibiotic nano material.

7. (Currently Amended) The transparent grip ~~having of~~ a golf club as defined in Claim 1, wherein the transparent shell (40) is made of at least one of the group consisting of the polyurethane resin; ~~the~~ synthetic rubber (EPDM) composed of the mixture of ethylene, propylene and non-conjugated diene; ~~the~~ synthetic rubber composed of EPDM added further with the styrene-butadiene-rubber, dioctylphthalate and natural rubber; or ~~the~~ ethylene-vinylacetate-copolymer (EVA).

8. (Currently Amended) The transparent grip ~~having of~~ a golf club as defined in Claim 7, wherein the transparent shell (40) is further ~~added with~~ includes a perfume.

9. (Currently Amended) The transparent grip ~~having of~~ a golf club as defined in Claim 8, wherein the transparent shell (40) is further ~~added with~~ includes a antibiotic nano material.
